## About Me

Educated Fullstack developer with a background in social geography and environmental science.

I'm people oriented at heart, and care about creating a good dynamic between colleagues, teams and customers.

My goal is to be the best teammate and the toughest opponent during Pub Quiz on after work events.

## Skills

### Programming Languages

Java Script, Type Script, HTML, CSS, Python

### Libraries & Frameworks

React, Next.JS, Node.JS, TailwindCSS, Astro

### Tools & Platforms

Docker, MongoDB, MySQL, Prisma, Git, GitHub, GitHub Actions, Netlify, Vercel, Storyblok, Sanity, Figma

## Languages

Swedish

English

## References

Contact Info will be provided upon request

## Experience

### Integration Engineering Co-Op

nov 2024 - may 2025

#### Funnel

- Built Custom Connector Plugins for API data retrieval using Python and Cursor.
- Inquired about Custom Connector requests first hand via Hubspot.
- Led the full migration of an internal monitoring tool from Vue.js to React, setting up the development environment from scratch and rebuilding the application using React, TanStack Query, Axios and Funnel's internal UI library Gunnel.
- Designed and implemented a multi-environment CI/CD pipeline, deploying the application to three AWS instances: a staging environment and two production regions (US & EU).
- Added a new Snooze functionality. This Involved creating a new API endpoint and introducing API version 3 to prevent changes for services depending on version 2.
- Proactively initiated and facilitated a team workshop to identify improvement opportunities and outline a roadmap for potential future enhancements.
- Delivered the entire project within 2.5 months.

### Work and Travel

2015 - 2019

After finishing highschool I alternated between working and traveling.

## Education

### Web Development Fullstack Open Source

2023 - 2025

#### Nackademin

- Built interactive fullstack web applications using modern tools and frameworks like React and Express.js.
- Applied Agile work methods like SCRUM, on team projects.
- Gained foundational knowledge in database management, working with both MySQL and MongoDB for storing, querying, and structuring application data.

### Social Geography

2021 - 2023

#### Uppsala University

Studied a combination of courses focusing on social geography, community planning and GIS.

### Biology and Environmental Science

2019 - 2021

#### Swedish University of Agricultural Science

Studied a combination of courses focusing on chemistry, ecology and physical geography.
